

- Seaweed Supplements
- Soil Conditioners
- Soil Remediation
- Specialty NPK Blends
- Micronutrients
- Soil Moisture Management
- Combination Products
- Pond & Lake Management

Benefits of Use:

- Low burn potential
- Slow release nitrogen for more consistent growth and color
- Enhanced nitrogen uptake and tissue nitrogen levels from organic acids
- Minimum growth surges and declines
- Improves turf establishment and density

Problems Addressed:

- Growth surges caused by the use of quick release nitrogen
- Inconsistent nitrogen response on sandy soils
- Loss of nitrogen in highly leached soil
- Thin turf or weak growth
- Poor color

Guaranteed Analysis:

Total Nitrogen (N).....28.00%
 20.20% Water Soluble Organic Nitrogen (N)*
 7.80% Urea Nitrogen (N)

Derived From:

Urea-Triazone Solution. This product also contains organic acids.

*This product contains 20.20% Slow Release Nitrogen (70% of the total N) from Urea-Triazone Solution.

Physical Characteristics:

10.56 lbs./gal. (2.96 lbs. N/gal.); pH 9.3

Container Sizes & Model Numbers:

2.5 Gallon Jug Model #57129
 30 Gallon Drum Model #57130
 275 Gallon Tote Model #57131

Enviro N™

28-0-0
 70% SRN

Enviro N (28-0-0) is a controlled release nitrogen source for heavily used turf areas. Nitrogen is supplied in a urea-triazone solution, which has demonstrated superior plant growth response compared to other sources of N in controlled studies. Enviro N provides consistently high quality color and uniform turf growth without surges and declines. Enviro N has a low burn potential (even at high rates) and may be left on leaf blades for a period of time before being watered into the soil. It can be applied in substantially lower volumes of water due to an extremely low phytotoxicity. It is also compatible with most herbicides, insecticides and other pesticides.

Application Instructions:

Enviro N can be applied through fertigation or conventional spray. It can be applied alone or tank mixed with other products. One gallon of Enviro N (28-0-0) contains 2.96 lbs. of nitrogen. Refer to the table below to determine the volume of fertilizer to apply to achieve a certain amount of nitrogen. Apply Enviro N diluted with 2 gallons of water per 1,000 sq. ft. or 80 gallons of water per acre.

Desired lbs. of N	Fl. oz. per 1,000 sq. ft.*	Gallons per acre**
0.10	4.3	1.5
0.125	5.4	1.8
0.25	10.8	3.7

*Apply in 2 gal. of water per 1,000 sq. ft. **Apply in 80 gal. of water per acre.

Compatibility:

Perform a standard “jar test” to check compatibility with other products before mixing.

Mixing Instructions:

1. Shake well before using
2. Partially fill the tank with water and start agitation
3. Slowly add products to the circulating mix one at a time
4. Fill the tank to the desired level and continue to agitate thoroughly

Handling and Storage:

Store between 40°-120° F. Avoid direct heat or fire. Decomposition may occur at high temperatures. Avoid freezing. Keep out of reach of children. Refer to product SDS for additional safety instructions.
