

PLANTING PROGRAM

Solutions to Enhance Your Seasonal Color

BloomPlex™ (8-16-5) *NPK Blend with Micronutrients*

High quality sources of phosphorus to promote flowering and root development.

- Enhances blooming and rooting
- Provides chelated micronutrients
- Formulated with phosphites

CytoGro®

Root Hormone Biostimulant

EPA registered hormone biostimulant designed to increase root mass.

- Stimulates root development
- Provides consistent cytokinin content
- Enhances stress tolerance

Hydretain® Granular *Root Zone Moisture Manager*

Hygroscopic humectant technology converts soil humidity into plant usable water droplets.

- Reduces watering requirements
- Delays wilt and drought stress
- Increases nutrient uptake

3 Step Planting Program

- Step 1: Incorporate 1 lb of Hydretain Granular OC or QD per cubic foot of planting media at planting.
- Step 2: Mix 32 oz of CytoGro & 24 oz of BloomPlex per 100 gallons of water and drench the root zone.
- Step 3: Repeat CytoGro and BloomPlex drench every 4-6 weeks.

Tank Mixing Guide: Fill tank with water to 1/2 total volume. Add products one at a time. Fill tank with additional water to reach total volume.
